What is this stuff? wondered Parker, and her companion pointed her umbrella to the drawings that plastered the walls. The raw materials for the best forgeries ever seen replied her friend. This is where they were created. Together they examined the drawings, exclaiming softly as they recognized several objects from the Museum. Parker picked up one of the colorful lumps and frowned. What is this, Peele? Its soft like clay, but Ive never seen these colors before. No, said her friend, nor have I-at least in this form. I suspect it requires a catalyst of some type to render it into the false gems-ah, here! Peele uncovered an array of electric ovens. Heat-how charming. This must be some type of polymer, which, when brought to the proper temperature, then hardens. I have heard rumors. Could become just about anything, in skilled hands.
